

ONLINE SAFETY SESSIONS FOR STAFF

Duration: 60 mins (incl. Q&A). Delivery: in-person or via live webinar.

5 EMPOWERING SAFER CHILDREN ONLINE

This is our most popular session aimed at those with, or working with children from 8-13 years old which offers a general overview of social media, gaming and the online world. Our aim is not to scare, but rather to raise awareness of what children are doing online and offer practical advice and resources to help participants deepen their knowledge. Areas of focus are popular apps & protecting privacy, areas of risk, digital wellbeing & critical thinking and useful resources.

6 HELPING TEENS THRIVE ONLINE

Whether we like it or not, being online is part of life, and none so much perhaps as for teenagers. This session aims to raise awareness of what young people are doing online, and the associated risks and safeguards. We provide information and guidance on platforms teenagers are using, digital literacy and wellbeing, and the inherent risks of being online: oversharing and privacy, cyberbullying, sexting, grooming and digital footprint.

7 DEVELOPING DIGITAL MEDIA LITERACY

This interactive workshop looks at how we can develop the increasingly important skill of Digital Media Literacy in our 'post-truth' world, awash with easily accessible and rapidly spread misinformation. This session will look at types of information online, targeted advertising, quizzes and scams, image and digital well being, protecting personal information and using others' content, and the importance of a positive digital footprint.

8 MORE THAN A GAME?

A gaming-focused session aimed at those with, or working with children from 8-13 years old. We have come a long, long way from the days of Tank Attack, Pac Man and joysticks to the hyperreal games and immersive experiences of today! This comprehensive session will take participants on a tour through the often baffling world of gaming and equip them with the knowledge to make more informed decisions, by covering the positives and negatives of this now multi-billion dollar industry.
